### **DETAILED ACTION**

### Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 1. Claims 1-9, 11-15, and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Palenik III (3987579).

Palenik discloses an universal fixture having a plurality of dual axis clamps (38) each rotatably and slidably secured rods (fig.3), and base (13). Palenick III discloses enough parts to anticipate all claim pluralities.

2. Claims 1-9, 11-15, and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Hewson (4253649)

Hewson discloses an universal fixture having a plurality of dual axis clamps (fig.3) each rotatably and slidably secured rods (41), and base (60). Hewson discloses enough parts to anticipate all claim pluralities.

3. Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Steffen (Re25802). Steffen discloses an universal fixture having a plurality of dual axis clamps (11) each rotatably and slidably secured rods (60,66,65 or fig.3), and base (61). Steffen discloses enough parts to anticipate all claim pluralities. A plurality of threaded machine screws (52&63).

## Response to Arguments

4. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Application/Control Number: 09/932,018 Page 3

Art Unit: 3723

a. Applicant's arguments filed 12/15/03 have been fully considered but they are not persuasive. The rejections of the claim is inregard to the lockable limitation not being clearly recited. The applicant is relying on this for patentablility so all arguments are most until the 112 issue is addressed.

- 5. Applicant has submit arguments in regard to patentability.
  - b. Claims were amended to show that the clamps are rotatable and slidable relative to each other.
    - i. The prior shows clamps that are rotatable and slidable relative to each other. The rods not clamps are ridgidly fixed with respect to each therefore they met the terms of the claim. The clamps frictionally lock the rods at the very least which reads on the instant invention.
  - c. Applicant has submitted a definition to the term clamp.
    - ii. The definition submitted by the applicant is not the broadest interputation of the term clamp. It is more narrow than what can possibly be defined as a clamp. The applicant should see the definition found by the examiner. Please see the attachment. The definition as seen states a device that grips, supports or joins something together. There is not really structure define. This means that the prior art still reads as a clamp.
  - d. Applicant argues that some parts are inherent to clamp.
    - iii. The definition found by the examiner does not define any structure. Class 269 has many clamps with many structures that may or may do the same thing or look a certain way. According the broadest definition there is no structure found to even make a claim of inherent structure.

#### Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Pajeau discloses a device..

Art Unit: 3723

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LEE D WILSON whose telephone number is 571-272-4499. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, JOSEPH HAIL can be reached on 571-272-4485. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application
Information Retrieval (PAIR) system. Status information for published applications may be obtained from
either Private PAIR or Public PAIR. Status information for unpublished applications is available through
Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should
you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC)
at 866-217-9197 (toll-free).
